A dedicated front-end developer with 6 months of experience, specializing in React. I also have proficiency in HTML, CSS, JavaScript, Bootstrap, Node.js, Express.js, and REST API development. A developer with mature and stable individual with excellent communication and coordination skills, a strong sense of responsibility, and a positive attitude towards both life and work. I am always eager to adapt to new technologies and methodologies.

EXPERIENCE

Software Developer Engineer   Jan 2024 - Present

Pixonix Software Technologies, Nagpur

I have worked at Pixonix Software Technologies as a front-end developer, focusing on React, HTML, and CSS. During my time here, I have:

Developed Flexible and Reusable Components:

- We have created modular and reusable components using React, enhancing code maintainability and efficiency.

Data Fetching and Integration:

- We utilized Axios to perform API calls and fetch data, ensuring seamless data integration and real-time updates.

Dynamic Content Rendering:

- Implemented data filtering and mapping techniques to dynamically render content, improving user interaction and experience.

User Interface Enhancement:

- Developed and styled components using HTML, CSS, and JavaScript to create visually appealing and user-friendly interfaces.

Responsive Web Design:

- Ensured that web components were responsive and optimized for various devices, enhancing accessibility and usability.

Project Workflow Management:

- Used tools such as Figma and draw.io to create and manage project process flows, aiding in clear communication and project planning.

COMPANY PROJECTS

1. Shippyfi

Shippyfi is a Next.js application designed to facilitate the shipping of items from one location to another. Users can select a shipping company based on estimated costs, previous ratings, and feedback. The application features a SQL database, and a backend built with .NET Core, all deployed to a Linux VM within Docker containers.

2. True Square Feet

True square feet are a real estate application user can buy, sell or rent their properties. Playing a pivotal role in the development and maintenance of Both the ADMIN Dashboard (NEXT.JS) and the user website (ReactJS), showcasing versatility in handling different aspects of the application.

3. CMS

Spearheading the ReactJs team's activities on the frontend and partnering with the Dot Net team on the backend development of the Compliance Management System.

4. BANGUL GOLD

I contributed to this project as a React Native Developer in this project we are streaming live gold prizes and representing the same data in charts.

5. FINAPP

Finn App is designed as a comprehensive **finance management system**. Admins can oversee and manage the **financial status** of multiple users. Provides tools for admins to guide users on **stock investments** and **mutual funds. The** platform aims to help users **generate profit** through financial advice. Frontend developed using **HTML, CSS, and React**, with the backend powered by **.NET**.

PROJECTS

Personal Portfolio:

- Developed a personal portfolio using HTML, CSS, Bootstrap, React, and React Icons.
- Showcases my skills, projects, and experience in web development.
- Features a clean and responsive layout for optimal viewing across devices.
- Utilized Bootstrap for quick and efficient styling.
- Integrated React to power dynamic components and enhance user experience.
- Added React Icons for visually appealing and functional icons throughout the site.

Link

E-commerce app:

- Built a fully functional e-commerce application to deepen backend development skills.
- Frontend developed using HTML, CSS, and React.
- Backend powered by Node.js, Express, and MongoDB.
- Key features include 'Add to Cart' functionality and the user ability to post products for sale.
- Enhanced skills in managing front-end and back-end integrations.
- Gained experience working with databases and developing full-stack applications.
